YOUR COMFORT IS OUR CONCERN

**W**ith a reputation for quality, cleanliness and courtesy, it is no wonder that home and business owners alike make Francis ClimateCare their first and only choice for Ottawa heating and air conditioning (AC/HVAC). It's our reputation for quality heating and air conditioning that has kept us in business for more than 80 years.

In celebration of our 80th birthday, Francis ClimateCare is on a mission to help Ottawa reduce the carbon footprint of our City. Over the last two years, Francis ClimateCare has reduced Ottawa's carbon footprint by over 250 Tons of carbon through advanced water heating solutions and improved efficiencies in home heating. This year we plan to double our efforts to reduce the carbon footprint of Ottawa by another 200 Tons or more.

In addition, Francis ClimateCare continues to add to its traditional residential and commercial boiler heating services with new innovations such as radiant floor heating to save you money through water saving upgrades and maintenance packages. We even have on staff licensed natural gas technicians to provide natural gas hookups to energy saving appliances.

For 80 years, we have been Ottawa's heating & HVAC (air conditioning) specialist providing licensed gas fitters and AC servicemen for Canada's National Capital region including Ottawa, Nepean, Kanata, Stittsville, Carp, Barrhaven, Ottawa South, Vanier, Gloucester, and the surrounding communities.
